Self Measuring Pumps

¶ Do you handle oil, gasolene or liquid of any kind? Then you need a Bowser Self-Measuring Pump to help you handle it. No matter how volatile or dangerous to handle the oil may be, a Bowser Pump will take care of it all right, and will do it quickly, and without any spilling or waste. With a Bowser Pump you can measure any predetermined amount accurately and quickly; you can tell at any time just how much oil you have pumped; and, if you want to sell oil, it will instantly compute the value of the amount pumped, no matter what the quantity.

¶ Let us send you some of our Bulletins. They are free, and they will furnish some interesting reading for any one who handles oil.

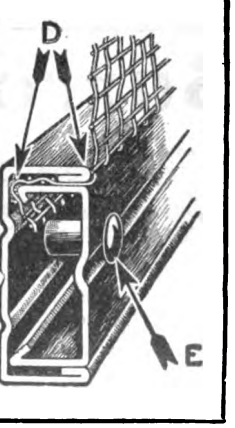
Cin-Man-Co REWIRABLE METAL FRAME FLY SCREENS



Are strong, durable and ornamental. Will not rot, warp, shrink or swell. Work easy in wet or dry weather; easily taken apart and rewired. Made sliding or hinged and in any mesh, size or shape desired—basket, circle, segment top, bow or bull's-eye.

Cut to right shows frame construction and method of securing wire cloth, held by rounded corners, forming a perfect water shed. Open rivets are easily removed for rewiring. Cinmanco Bronze wire cloth (90 per cent. copper) is rustless in any climate.

Cut to left shows reinforced corners, stationary bronze lift, always out of the way. Frame is equipped with durable detachable spring for holding screen in place.

We make to order window, door or porch screens for the home, office, club or public buildings. Write to-day for catalog and estimate on your work.

THE PICTURES shown above need no commentary, they tell their own story clearly. The two illustrations in the upper left and right hand corners show "WHAT WE DO" in Architectural and Structural Iron Work and in Steel Skeleton Buildings for mining and manufacturing purposes. The two lower left and right hand illustrations show the well known Twin City Corliss Engine and the Muenzel Gas Engine and Suction Gas Producer. The central illustration gives a good idea of our plant which covers 18 acres of ground.

We issue illustrated catalogues describing our manufacturing products that we will be pleased to mail YOU.

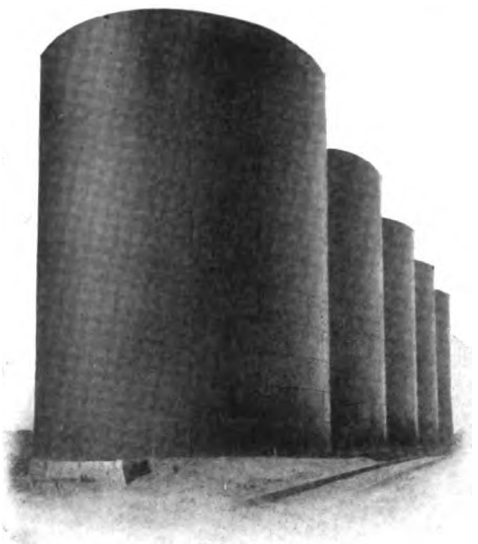
OIL STORAGE SYSTEMS

¶ We are the pioneers and the leaders in building fire-proof, evaporation-proof and leak-proof oil storage systems.

¶ Our equipment provides for the storage and the delivery of liquids to any part of the plant. Liquid is delivered by a fire-proof pump which measures automatically and delivers not a drop more or less than the quantity required—pumps lock when you finish pumping.



¶ Highly inflammable liquids handled in any building. All installations made to conform with building ordinances and fire underwriters' rulings. Safe, Economic, Convenient. Saves labor, time, evaporation and waste.

"CLEAN-SEAT" VALVES

"CLEAN-SEAT" VALVES

are made so that all sediment, foreign matter, etc., is removed from the seats and discs just before closing, and they seat squarely with a metal to metal contact. That's why they stay tight and last so much longer than other valves. The distribution of metal in "CLEAN-SEAT" VALVES is such that they will stand the hardest service to which valves can be subjected. .. ..

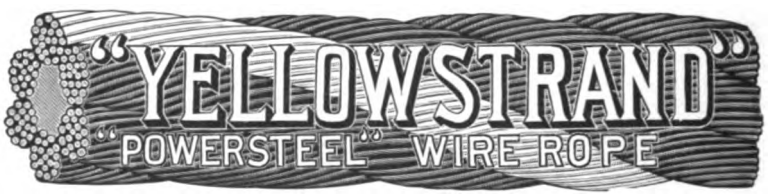
THE TRUE VALUE OF A WIRE ROPE

IS THE RATIO OF ITS COST TO THE SERVICE RENDERED.



Appearance of ¼" traction rope after transporting 660,000 tons of ore.
Cost less than ⅕ of a cent per ton.

¶ The price of a wire rope is not a gauge of its economy. A good rope for one purpose does not always give equally good results for some other purpose. Our experts thoroughly understand this matter, and it costs you but the postage to get their advice. Write for Book.
